

A1. Nudge:

Thanks for showing up to the free live masterclass earlier guys.

Feel free to ignore this if you've already submitted your application form.

This is your nudge to do it if you haven't yet.

I hope you're all aware that the value you've just gotten will fade away pretty fast.

Here's the link for it: [LINK]

A2. Client Result:

Let me tell you guys about one of my students.

He came to me while juggling a full-time job with studies.

He's doing \$32,000 per month with his own warehouse now.

All that he did throughout that timeframe was select winners, source at strong rates, and eliminate the fulfillment load.

The only thing standing between him and yourself is the decision to make a change.

You can get started with that right here: [\[LINK\]](#)

A3. Recap:

I'm sure most of you guys remember my offer on the free live masterclass.

I'll give a little reminder though for the ones in the back.

2 Nice Profits provides you with one-on-one access, one-on-one coaching calls, group coaching calls, community, and course content.

The Product Vault is only one of the many bonuses included.

The only setback will be remaining stuck where you are forever.

This is what you've been looking for: [LINK]

N1. Nudge:

I know that some of you guys couldn't make it to the free live masterclass.

You're lucky that I've got a replay of it though: [LINK]

I'm just saying that it's not going to be up forever.

N2. Recap:

I'm going to give you guys a quick rundown of the free live masterclass.

My whole approach to hitting \$10,000 per month with Amazon FBA can be boiled down to being old school versus playing it smart.

I've covered absolutely everything around this throughout it.

I'm only keeping the replay up for a little longer: [\[LINK\]](#)

N3. Pressure

I just want to bring something to the surface for all of you guys.

You registered for the free live masterclass because you wanted to hit \$10,000 per month with Amazon FBA through online arbitrage.

This is without gambling on the product, settling for thin margins, or running it all yourself.

I'm only mentioning this because I'm about to take down the replay: [\[LINK\]](#)
